

## PUBLIC INTELLECTUALS PROGRAM

The National Committee on United States-China Relations' Public Intellectuals Program is designed to nurture a new generation of China specialists who have the interest and potential to play significant roles as public intellectuals. The goal of the program is to upgrade the quality of the American public's understanding of China by strengthening links among U.S. academics, policymakers, and opinion leaders. The first three rounds of the program (2005-13) were funded with grants from The Henry Luce Foundation and The Starr Foundation. The fourth, fifth, and sixth rounds of the program (2014-20) are funded by Carnegie Corporation of New York.

Through a varied set of activities, the program helps twenty young American China scholars and other specialists deepen and broaden their knowledge about China's politics, economics, and society, and encourages them to use this knowledge to inform policy and public opinion. The multi-year enrichment opportunity is intended to complement the fellows' primary academic or professional positions. It includes two meetings in Washington focusing on the D.C.-based China policy community; a meeting in San Francisco; trips to China as a cohort; participation in National Committee programs as scholar-escorts; access to a media coach who can assist fellows in writing and placing op-eds; and a requirement that the fellows organize local public education programs. For more on the program, visit <http://www.ncuscr.org/pip>.
